**INTRODUCING 3DOODLER CANDY –  
THE YUMMY 3D PEN MADE FOR KIDS!**

*Health-conscious candy pen brings sweet, safe, art to life  
for families later this year*

**New York — March 3, 2025 — [3Doodler](#)**, the leader in 3D printing pen technology, is thrilled to unveil **3Doodler Candy**, the first-ever 3D printing pen designed specifically for

kids and families to create with candy. Set to launch later this year, 3Doodler Candy makes it easy, safe, and fun to transform imagination into yummy works of art.

Building on the groundbreaking success of the 3Doodler Chef, which brought candy crafting to culinary professionals and hobbyists last year, the **3Doodler Candy** is tailored for young creators. Featuring a streamlined, mess-free design and specially formulated candy capsules made from isomalt, the pen lets users create mouthwatering 3D designs while offering a health-conscious alternative to traditional sweets.

“We saw how much fun people had with the 3Doodler Chef, but really wanted to create a tool suited to all those families and young makers out there,” said Daniel Cowen, Co-Founder and CEO of 3Doodler. “The 3Doodler Candy takes that same magic and makes it even more accessible—safe, easy to use, and designed to offer a healthier, creative experience without compromising on fun or flavor.”

## A Health-Conscious Twist on Candy Creativity

The **3Doodler Candy** offers an interactive way to create with candy while keeping physical and dental health in mind. Kids and parents can draw colorful, edible creations

in 3D, using candy that's gluten-free, vegetarian-friendly, and safe for individuals with diabetes.

### **Key Features of the 3Doodler Candy:**

- **Designed for Young Creators** – Safe, fun, and user-friendly, making it ideal for kids and families.
- **Mess-Free, Button-Activated Creating** – Simply insert a candy capsule, press the button, and start doodling!
- **Made with Health-Conscious Ingredients** – Each candy capsule is made with isomalt, a sugar substitute that's gentle on blood sugar and teeth.
- **Quick and Simple** – Heats up fast so you can start crafting candy designs in seconds.
- **Comfortable and Kid-Friendly** – Lightweight and ergonomic for small hands, making long creative sessions effortless.

Whether crafting candy critters or personalized lollipops, the **3Doodler Candy** makes creativity fun and simple for all ages. Families can unlock endless possibilities while enjoying a smarter way to create sweet works of art.

The **3Doodler Candy** will be available later this year. Sign up [HERE](#) to be the first to know when you can get your hands on this exciting new way to create with candy!

#### **About 3Doodler**

Since 2013, 3Doodler—a WobbleWorks brand—has led the way in 3D printing pen technology, inspiring creators of all ages. From the 3Doodler Start+ for young artists to the professional-grade 3Doodler PRO, the company continues to push the boundaries of hands-on creativity. The 3Doodler Candy is its latest innovation, combining fun, sweet, and health-conscious creativity into one unique (and tasty) experience. Learn more at [the3doodler.com](http://the3doodler.com).
